LIGHTWEIGHT**

**10
WARRANTY
YEARS**

Polymer concrete is an environmentally-friendly material that is perfect for outdoor use. Polymer concrete is made from mineral aggregates bonded with polyester resins, which yields a lightweight, smooth and pore-free surface.

Because the concrete is strong and durable, it withstands water, freezing temperatures and UV light over many years, and requires almost no maintenance. At the end of its life cycle, the polymer concrete can be recycled as gravel.

PRODUCTS

THE VERY BEST QUALITY AND DURABILITY

Our products are made of long-lasting polymer concrete, so they can stand up to the elements. We make table tennis and foosball tables, rock-climbing and tennis practice walls, and seating and planters for use in private and public schools, playgrounds, hotels and parks.

Table Tennis Tables

RAL 7016, RAL 5002, RAL 6002, Granite Green,
